Afik Aharon

Software Developer | Backend, Full-Stack & Applied AI

afik3248@gmail.com | 0556606990 | LinkedIn | GitHub | Portfolio

PROFILE

Computer Science graduate with professional experience developing and supporting mission-critical enterprise backend systems, complemented by hands-on full-stack and applied AI projects. Builds REST APIs, data-driven applications, and AI-agent workflows using Python, JavaScript, React, and Node.js. Experienced in requirements analysis, debugging production issues, and working with technical and business stakeholders.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, SQL, C++ (academic/project)

Backend & Frontend: Node.js, Express, FastAPI, React, REST APIs, HTML/CSS

Databases & AI: MongoDB, Firebase, ChromaDB, LangGraph, LangChain, RAG, PyTorch, Hugging Face

Developer Tools: Git, Docker, Docker Compose, Linux, Jira, Postman, Codex, Gemini

Cloud: AWS (academic course) | **Testing:** pytest, Playwright, Jest, Supertest (project exposure)

PROFESSIONAL EXPERIENCE

System Consultant & Backend Developer | Ness Technologies

Student Position | Nov 2025 - Jul 2026

- Developed and supported backend systems in large-scale, mission-critical production environments.
- Analyzed business and technical requirements and implemented backend solutions in enterprise systems.
- Investigated complex production incidents through system debugging and data-flow analysis; collaborated with technical and business stakeholders.

Mainframe Backend Developer | IDF - Shahar Software Unit, LOTEM

2020 - 2023

- Developed and maintained critical IBM Mainframe backend systems and translated business requirements into production code.
- Resolved production failures across interconnected components, worked across teams and mentored new developers.

SELECTED PROJECTS

KnowledgeHub - AI-Powered Document Search Platform | GitHub

Python, FastAPI, React, LangGraph, LangChain, Gemini, Groq, ChromaDB, Docker Compose

- Built a full-stack application enabling PDF/DOCX uploads and natural-language queries with AI-agent workflows and RAG.
- Integrated REST APIs, authentication, document processing and hybrid semantic/BM25 retrieval into connected services.

Cost Manager - Microservices REST API | GitHub

Node.js, Express, MongoDB Atlas, Mongoose | Apr - May 2026

- Built four Node.js microservices with data models, monthly reports, centralized logging and API validation.

Generative AI for Architectural Change Detection | GitHub

Python, PyTorch, Hugging Face | Oct 2025 - Feb 2026

- Built a vision and generative-AI pipeline; threshold tuning improved recall from ~50% to 96.2% (F1: 0.81).

Smart Robotic Arm for Object Sorting | GitHub

Arduino C++, ESP32, Grove Vision AI, React

- Integrated computer vision, control logic and a six-servo robotic arm to recognize and sort objects by color.

EDUCATION

B.Sc. Computer Science | HIT - Holon Institute of Technology | Jan 2024 - Jul 2026 | GPA: 90

LANGUAGES

Hebrew - Native | English - Professional
